

# The PROFLORA™ ENERGIZER Capsule

## The next generation of probiotic capsules

ProFlora Energizer Capsule for Sheep and Goats is the ONLY powdered propylene glycol capsule that improves both production and profitability. ProFlora Energizer Capsule for Sheep and Goats is 100% made in Canada with a patented microencapsulation and contains a research-backed combination of powdered propylene glycol fortified with *Saccharomyces boulardii*. This is proven to help correct the negative energy balance in the final stages of gestation. It is well known that the clinical symptoms of ketosis in small and large ruminants consist of the loss of appetite, the preference for forage over concentrated feed, and the smell of acetone in the mouth. These symptoms of ketosis are easily recognizable. The propylene glycol, through the mechanism of gluconeogenesis in the liver, turns into glucose which provides energy for the animal. *Saccharomyces boulardii* enhances immunity and contributes to the overall health of the digestive system. By providing this in capsule form and administering it with a balling gun, we have alleviated the need to drench with propylene glycol and reduce the risk of pulmonary aspiration.

## BioFer Science Inc

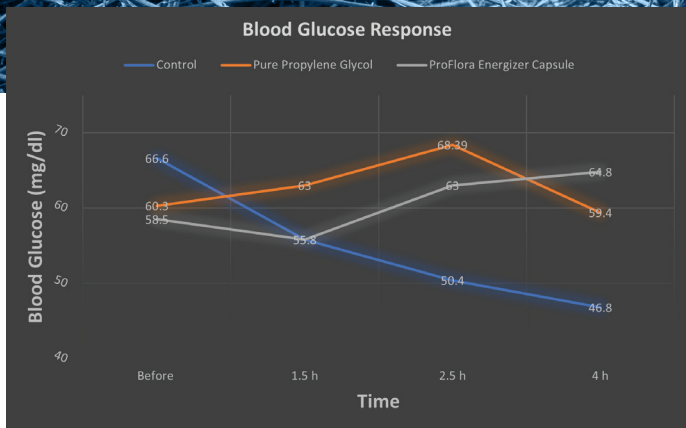

BioFer Science Inc. is an innovative company based in London, Ontario that is capable of fermenting and microencapsulating highly concentrated probiotics and postbiotics that naturally support animal health, immunity, and performance. We take great pride in providing live strains that are virus-free, harvested for quality rather than quantity, and microencapsulated to ensure the highest productivity when they are fed. BioFer Science has conducted research and on-farm trials and has achieved very positive results in both production and gains. We are proud to supply easy-to-use capsules that will improve output and animal health.

## PROFLORA™

### Powdered Propylene Glycol & Saccharomyces boulardii

4.08 g Powdered Propylene Glycol g & 10 billion CFU probiotics/7g capsule

### Net Contents

100 capsules

### Ingredients per 7 g bolus

Powdered Propylene Glycol 4.08 g

### Microbial composition

Saccharomyces boulardii 10 billion CFU

### Directions

Administer THREE capsules per day for TWO days to the animals with the following symptoms: loss of appetite, preference for forage over concentrated feed, and the smell of acetone in the mouth.

**NO MILK WITHDRAWAL TIME**
